Customer summary

intermediate.crt · Evidence ID: E0004 · Case: RV-SAMPLE-001

Needs attention

The file was hashed and checked. Some points need attention.

What we did

Each file was opened read-only, hashed in a single pass with the selected algorithms, and checked against a table of file signatures. Every action was written to a hash-chained audit log.

What we found

- Certificate chain verified at the date checked. OpenSSL built a path from C=CO, O=Rakvor Lab, CN=Rakvor Lab Intermediate CA to the trust anchor file:R:\anchors\rakvor-lab-root.crt and the chain verified at 2026-06-01T00:00:00Z: signatures, validity dates, purpose and constraints passed. Revocation is reported separately: a REVOCATION_UNKNOWN finding for the same certificate means its revocation status could not be determined.
- Revocation status unknown. No CRL or OCSP response covering C=CO, O=Rakvor Lab, CN=Rakvor Lab Intermediate CA was available for the date checked (none of the 1 CRL(s) and 0 OCSP response(s) supplied covers this certificate (issuer C=CO, O=Rakvor Lab, CN=Rakvor Lab Root CA)); its revocation status could not be determined.

Digital fingerprint

This fingerprint identifies the exact content of the file. Any change, even of one character, would produce a different value.
