Customer summary

tsa.crt · Evidence ID: E0008 · Case: RV-SAMPLE-001

No issues found

The file was hashed and checked. The checks applied found no issues.

What we did

Each file was opened read-only, hashed in a single pass with the selected algorithms, and checked against a table of file signatures. Every action was written to a hash-chained audit log.

What we found

- Certificate chain verified at the date checked. OpenSSL built a path from C=CO, O=Rakvor Lab, CN=Rakvor Lab TSA to the trust anchor file:R:\anchors\rakvor-lab-root.crt and the chain verified at 2026-06-01T00:00:00Z: signatures, validity dates, purpose and constraints passed. Revocation is reported separately: a REVOCATION_UNKNOWN finding for the same certificate means its revocation status could not be determined.

Digital fingerprint

This fingerprint identifies the exact content of the file. Any change, even of one character, would produce a different value.
