Customer summary

signed-then-modified.pdf · Evidence ID: E0021 · Case: RV-SAMPLE-001

Problem found

The file could not be fully examined or shows a serious problem.

Document history

The document was saved 3 times; the last change was made 3 days after creation. This information comes from the document itself and is not proof on its own.

What we did

Each file was opened read-only and hashed in a single pass with the selected algorithms. PDF files were then parsed without being modified: every saved revision, its dates and producer, digital signatures, fonts and producer fingerprints were recorded, and pages of consecutive revisions were compared visually. Every action was written to a hash-chained audit log.

What we found

- Content changed after signing. Signature Signature1 covers an earlier revision; revision(s) 3, added afterwards, change page content or document structure, which the signature does not cover.
- Changes not allowed by the certification signature. Signature Signature1 certifies the document with permission level 2 (1 = no changes, 2 = form filling and signing, 3 = also annotations), but revision(s) 3 contain changes outside that level.
- Incremental updates. The file contains 3 revisions: the original save plus later updates appended to the end of the file. Each earlier version can be extracted and compared.
- Time gap between revisions. Revision 3 is dated 3 d 0 h 0 min after revision 2 (according to their modification dates).
- Digital signature present (trust not verified). The file contains signature Signature1, signed by O=Rakvor TEST,CN=Ana Ruiz (TEST examiner). Its byte coverage and cryptographic integrity are reported separately.
- Visible change between revisions. Rendering revision 2 and revision 3 gives different images on page(s) 1 (largest changed share 0.000314); pages added: -; pages removed: -. The changed areas are outlined in the comparison images.

Digital fingerprint

This fingerprint identifies the exact content of the file. Any change, even of one character, would produce a different value.

sha256	`a6e9f4503e7a5fd6fabfff5a2e7b99d949f934e04a65dfe46814cc8ed578a0b3`

Recommended next step

Do not rely on this file until the examiner has explained the problem.
