Run statistics report

Run ID: 20261113T232802Z-2f0fe5

Tool	rv-certcheck 0.2.2
Case	RV-SAMPLE-001
Examiner	Sample Examiner
Started (UTC)	2026-11-13T23:28:02.740Z
Finished (UTC)	2026-11-13T23:28:02.793Z
Duration	0.1 s
Interface	cli
Hash algorithms	sha256 + md5
Items	8
Bytes	10364
Errors	0
Throughput	191.0 KiB/s

Findings by severity

High	2
Medium	1
Low	0
Informational	6

Findings by type

Certificate chain verified at the date checked	4
Certificate expired at the date checked	1
Certificate revoked	1
Not a recognised cryptographic object	1
Revocation status unknown	1
Timestamp token valid	1

Items by detected type

RFC 3161 timestamp token	1
X.509 certificate	5
X.509 certificate revocation list	1
unknown	1

Duplicate groups

None

Case folder

Case	RV-SAMPLE-001
With an evidence ID from intake	0

Newly registered by this run	0
Verified against the registry	8
Different from the registry	0
Not in the registry	0
Case folder	R:\case

Items

#1 E0001 data.tsr	No issues found · 2557 bytes · 2 findings
#2 E0002 data.txt	No issues found · 44 bytes · 1 findings
#3 E0003 intermediate.crl	No issues found · 458 bytes · 0 findings
#4 E0004 intermediate.crt	Needs attention · 1330 bytes · 2 findings
#5 E0005 leaf-expired.crt	Problem found · 1574 bytes · 1 findings
#6 E0006 leaf-revoked.crt	Problem found · 1574 bytes · 1 findings
#7 E0007 leaf.crt	No issues found · 1566 bytes · 1 findings
#8 E0008 tsa.crt	No issues found · 1261 bytes · 1 findings

Limitations

- Every chain is judged at one instant (--at, recorded in each report); the same certificate can be valid at one date and expired or revoked at another.
- Offline, revocation is checked only against the CRLs and OCSP responses supplied (--crl, --ocsp, or found among the evidence); a revocation published elsewhere is not seen.
- Trust lists are used as dated snapshots (date and SHA-256 recorded); services added, suspended or withdrawn after the snapshot are not reflected.
- In version 0.1 the trust list's own XAdES signature is not verified; the snapshot's source and SHA-256 are recorded so it can be checked independently. The Colombian list is a curated file, because ONAC publishes no machine-readable list.
- Certificates issued by Rakvor's internal PKI are for internal use only: they are not a firma digital under Ley 527 de 1999, art. 28 (Colombia), and not qualified certificates under eIDAS (Regulation (EU) No 910/2014).
- The tool's results have been compared with OpenSSL and Python reference implementations on test sets, but no error rate has yet been measured on a validated corpus.
- A result without findings does not prove that a file is authentic or unaltered before acquisition.
- Modification times come from the file system of the examined copy and may differ from the original source.
- A trusted timestamp of the audit log shows that the log existed in this exact form at the stated time; it does not show that the examined copy matches the original source.

Trusted timestamp (RFC 3161)

Status	Not requested
Digital signature	This PDF is not digitally signed.

Audit trail

Audit chain head (SHA-256)	`7aae5be669a55bf58d62dfba46b3df8f10a93964fa5e6c293134c0034cbd6827`
Audit entries	65
Log folder	`R:\case\runs\rv-certcheck\20261113T232802Z-2f0fe5\logs`
