Customer summary

edited-incremental.pdf · Evidence ID: E0019 · Case: RV-SAMPLE-001

Needs attention

The file was hashed and checked. Some points need attention.

Document history

The document was saved 3 times; the last change was made 9 days after creation. This information comes from the document itself and is not proof on its own.

What we did

Each file was opened read-only and hashed in a single pass with the selected algorithms. PDF files were then parsed without being modified: every saved revision, its dates and producer, digital signatures, fonts and producer fingerprints were recorded, and pages of consecutive revisions were compared visually. Every action was written to a hash-chained audit log.

What we found

- Different software between revisions. The producer changes from “ReportLab PDF Library - (opensource)” in revision 1 to “Foxit PDF Editor Version 13.0.0” in revision 2.
- PDF editor fingerprint. Revision 2 carries the fingerprint of a PDF editor: Foxit PDF Editor / PhantomPDF (metadata producer: “Foxit PDF Editor Version 13.0.0”).
- Font added in a later revision. Font Courier-Bold first appears in revision 3 and is used by page content there.
- Incremental updates. The file contains 3 revisions: the original save plus later updates appended to the end of the file. Each earlier version can be extracted and compared.
- Time gap between revisions. Revision 2 is dated 2 d 3 h 0 min after revision 1 (according to their modification dates).
- Time gap between revisions. Revision 3 is dated 6 d 21 h 0 min after revision 2 (according to their modification dates).
- Visible change between revisions. Rendering revision 1 and revision 2 gives different images on page(s) 1 (largest changed share 0.000058); pages added: -; pages removed: -. The changed areas are outlined in the comparison images.
- Visible change between revisions. Rendering revision 2 and revision 3 gives different images on page(s) 1 (largest changed share 0.001099); pages added: -; pages removed: -. The changed areas are outlined in the comparison images.

Digital fingerprint

This fingerprint identifies the exact content of the file. Any change, even of one character, would produce a different value.
